print development

For this collection I wanted to develop a print. When doing my initial research I found this picture of Kurt Cobain, lead singer of Nirvana, wearing a floral dress while performing. This photo inspired a lot of my original ideas for the collection. I decided to use Photoshop to modify the image to create a completely new image from this. This dress was the basis of colour in my colour scheme.

One of various stages of print design can be seen. Some of these images I decided to modify my colour scheme to duplicate the image but in another angle. I have created my favourite print developments, all of which feature within this collection.

My customer is 18-25 and female, she is either in full time work or a student that works on the side. My customer has big dreams, loves to work and is fashion obsessed. loving social media to show off her stylish outfits to the world. loving being in a big city surrounded by people so she can show off her confidence and unmatched style. her fashion inspiration is street style and hip hop music is her go to.
