

PROGRAMME SPECIFICATION

1. Key Information

Programme Title:	FDS Sc Nursing Associate
Awarding Institution:	Buckinghamshire New University
Teaching Institution(s):	Buckinghamshire New University
Subject Cluster:	Nursing
Award Title (including separate Pathway Award Titles where offered):	FDS Sc Nursing Associate
Pathways (if applicable)	N/A
FHEQ level of final award:	5
Other award titles available (exit qualifications):	Certificate of Higher Education in Health Related Care Diploma of Higher Education in Health Related Care
Accreditation details:	Nursing and Midwifery Council (NMC)
Length of programme:	2 years
Mode(s) of Study:	Full Time
Mode of Delivery:	In person (on-site) delivery
Language of study:	English
QAA Subject Benchmark(s):	N/A
Other external reference points (e.g. Apprenticeship Standard):	NMC Standards Part 1, Part 2, Part 3 and of Proficiency for Registered Nursing Associates (2018) The IfATE Nursing Associate Occupational Standard (2018, updated 2022)
Course Code(s):	FSNURRAFT
UCAS Code(s):	NA99
Approval date:	March 2023
Date of last update:	

2. Programme Summary

This programme integrates academic and practice-based learning through collaboration between practice partners and the University. Over 2 years, Nursing Associate learners attend Buckinghamshire New University and spend periods in a range of clinical settings in order to acquire the knowledge skills and behaviours required to join the healthcare workforce in a generic role as a nurse associate. They will undertake 120 credits in each year of the programme, in order to achieve the Foundation Degree: Nursing Associate award and be eligible to apply for registration as a Nursing Associate with the Nursing and Midwifery Council.

3. Programme Aims and Learning Outcomes

Programme Aims

This programme aims to:

- Produce a registered Nursing Associate who meets the requirements of the Nursing and Midwifery Council Standards for pre-registration Nursing Associate programmes (NMC, 2018) and the Standards of proficiency for nursing associates (NMC, 2018).
- Produce a registered Nursing Associate who can provide care for people who may have mental, physical, cognitive and behavioural care needs, across the lifespan and in a range of settings where their needs must be supported and managed.
- Produce a registered Nursing Associate who consistently adheres to the precepts of The Code (NMC, 2018).

Improving literacy and numeracy are key objectives of our Programme and are incorporated within learning content, through academic feedback, assessment and tutorials.

Knowledge and Understanding (K)

On successful completion of the programme the learner will be able to:

ID	Learning Outcome
K1	Apply knowledge of commonly encountered health conditions in the provision of compassionate, safe and effective care and support to people in a range of care settings, in partnership with people, families and carers
K2	Take an active role in the prevention of and protection against disease and ill health, encouraging people to make informed choices to improve their mental, physical and behavioural well-being

Analysis and Criticality (C)

On successful completion of the programme the learner will be able to:

ID	Learning Outcome
C1	Act in the best interest of people by monitoring their experiences of care and identifying risks to safety, in line with local and national organisational frameworks
C2	Contribute to the ongoing assessment of people receiving care, including those with complex needs, recognising how and when to escalate care needs to the appropriate professional for expert help and advice

Application and Practice (P)

On successful completion of the programme the learner will be able to:

ID	Learning Outcome
P1	Demonstrate professionalism and accountability as a Nursing Associate, in the provision of safe, compassionate, evidence-based, person-centre care, and acting in the best interests of people

P2	Safely perform a range of procedures appropriate to the Nursing Associate role, sensitively and effectively and applying evidence based best practice
P3	Engage in public health community development to reduce health inequalities, promote health literacy and facilitate access to healthcare services
P4	Manage their own workload within the scope of practice of a Nursing Associate, identifying where elements of care can safely be delegated to others and demonstrate an awareness of their own resilience and capacity

Transferable skills and other attributes (T)

On successful completion of the programme the learner will be able to:

ID	Learning Outcome
T1	Perform their professional role in accordance with the current NMC Code recognising own competencies and limitations and taking responsibility for their actions
T2	Communicate and collaborate effectively with a range of professionals and carers in the integration of care across organisational boundaries
T3	Communicate effectively with sensitivity and compassion and to managing professional relationships with people and demonstrating an awareness of equality, diversity and inclusion issues
T4	Play an active role as a member of the interdisciplinary team, collaborating effectively with health and care professionals and others involved in providing care and undertake self and team reflection activities to promote improvements in practice

Graduate Attributes

The BNU Graduate Attributes of: Knowledge and its application; Creativity; Social and ethical awareness and responsibility; and Leadership and self-development focus on the development of innovative leaders in professional and creative capacities, who are equipped to operate in the 21st Century labour market and make a positive impact as global citizens.

4. Entry Requirements

The University's [general entry requirements](#) will apply to admission to this programme with the follow Typical applicant profile and any programme-specific entry requirements

This programme is suitable for people who wish to enter the healthcare workforce whether or not they have previous care experience.

Applicants must:

- Demonstrate appropriate values and behaviours demonstrated at selection (Values based interviewing)
- Demonstrate potential to study at level 5
- Maths and English: learners must have either Level 4/grade C GCSE Maths and English or Functional Skills L2 in Maths and English prior to commencing the programme.

- *Either* have completed the Care Certificate and provide evidence on admission of having done so; *or* complete the Care Certificate during the Course where it is embedded in the year 1 Practice Assessment Document.
- Undergo Occupational Health screening and be deemed fit prior to commencing placement learning.

Do applicants require a Disclosure and Barring Service (DBS)? Yes

If the learner does not meet the entry requirements they may, if they have relevant professional experience, still be invited for interview, where they will be required to demonstrate the necessary knowledge and understanding for entry onto the course.

Previous study, professional and / or vocational experiences may be recognised as the equivalent learning experience and permit exemption from studying certain modules in accordance with our [accreditation of prior learning](#) (APL) process.

5. Programme Structure

Level	Modules (Code, Title and Credits)	Exit Awards
Level 4	<p>Core modules:</p> <p>NAM4002 Introduction to Professional Practice in Nursing (20 credits)</p> <p>NAM4006 Becoming a Nurse Associate (20 credits)</p> <p>NAM4007 Fundamental Skills for Nursing (20 credits)</p> <p>NAM4008 Essential Anatomy & Physiology for Nursing (20 credits)</p> <p>NAM4009 Healthcare Numeracy (20 credits)</p> <p>NAM4010 Understanding Health, Illness Disability and Diversity across the Lifespan (20 credits)</p> <p>NAM4022 Beginning Nurse Associate Practice (0 credits)</p>	<p>CertHE Health-Related Care</p> <p>This award will be granted where the learner has achieved a minimum of 120 credits at Level 4 or higher.</p>
Level 5	<p>Core modules:</p> <p>NAM5001 Medicines Management for Nurse Associates (20 credits)</p> <p>NAM5002 Coordinating Integrated Care (20 credits)</p> <p>NAM5003 Evidence-based Practice for Nurse Associates (20 credits)</p> <p>NAM5005 Monitoring and Responding to Health and Care Needs Across the Lifespan (20 credits)</p> <p>NAM5006 Promoting Health Across the Lifespan (20 credits)</p> <p>NAM5007 Competence in nurse associate practice (0 credits)</p> <p>NAM5036 Professional responsibility as a nurse associate (20 credits)</p>	<p>DipHE Health-Related Care</p> <p>This award will be granted where the learner has achieved the full 240 credits required but has failed to meet the professional requirements of the programme, including the completion of clinical practice hours, and/or standards of conduct (impaired fitness to practise, practice fail on reassessment, failure to meet Declaration of Good Character and Good Health statement required).</p>
<p>Where an exit award is made, this would result in non-completion of the programme and the learner would not be eligible to register with the NMC.</p>		

6. Learning, Teaching and Assessment

Learning and teaching

Learners attend University one day a week and are taught through a range of classroom strategies to develop problem-solving and critical thinking skills, fostering independence and self-directed study. Learners also engage in online guided study activity including the use of specified eLearning programmes, used across the NHS, developing their digital skills. Classroom sessions are maintained with the use of authentic case studies and scenarios, which may be brought to the classroom by the learners themselves. All sessions are closely linked to the development of knowledge, skills and behaviours as outlined within the Nursing Associate Practice Assessment Document. They are encouraged to adopt a reflective approach to their learning, both for academic success and within the practice learning environments. Learners are encouraged to fulfil their potential by taking responsibility for their learning by engaging with preparation for sessions, independent reading, negotiation of learning opportunities within protected learning time, demonstrating assertiveness skills and resilience.

In practice learners will progress from practising under direct supervision in Level 4, becoming more independent and practising under increasingly under indirect supervision in Level 5. Theory teaching moves from addressing the fundamental knowledge underpinning practice and fundamental nursing skills in Level 4 through to knowledge and clinical skills to support contemporary care provision in Level 5.

Nursing Associate learners engage in teaching and practice learning experiences across all fields of nursing (adult, child, mental health and learning disability). They learn with and from other healthcare professionals, and experts by experience, both in the classroom and within simulated and practice learning environments. Within the programme are 800 hours of placement learning experience providing insights into the healthcare needs of people across the lifespan.

Assessment

Formative assessment and individual feedback are provided regularly by the learner's supervisor and assessor in practice and recorded in the Practice Assessment Document. Throughout the course, completion of the Practice Assessment Document requires regular reflection and assessment against the NMC's professional values, which reflect the British values of the rule of law, democracy, liberty and respect and tolerance. In addition, learning activities in class and online provide the opportunity for regular appraisal of individual progress and learning and feedback from lecturers.

The following summative assessment activities are used on this programme:

- Practice Assessment Document
- Exam
- Essays
- Oral exam
- Presentations

Reasonable adjustment is made to assessment where necessary on the recommendation of the University's Inclusion, Diversity and Disability Service.

Contact Hours

The FdSc Nursing Associate programme is a full-time course, based on 40 hours of learner activity each week over two academic years.

The programme runs over a 39-week academic year (excluding leave).

During year 1 learners will:

Attend university for 8-hour teaching days in 29 weeks

Engage in asynchronous guided learning activities of 4 hours each teaching week when not in practice.

Undertake an additional 229 hours of private study over the year.

This equates to **575 hours theory** in year 1.

Learners will undertake 2x periods of 28 hours/week (totalling 12 weeks) in practice placement learning alongside university, plus a period of 7 weeks of full-time (i.e., 37.5 hours) practice placement learning.

This equates to **599 hours practice** in year 1.

During year 2 learners will:

Attend university for 8-hour teaching day in 28 weeks

Engage in asynchronous guided learning activities of 4 hours each teaching week when not in practice

Undertake an additional 283 hours of private study over the year

This equates to **575 hours theory** in year 2

Learners will undertake 2x periods of 30hours/week (equalling 10 weeks) in external practice learning alongside university and private study, plus a period of 7 weeks full-time (totalling 237.5 hours) practice learning which equates to **562.5 hours practice in year 2**

7. Programme Regulations

This programme will be subject to the following assessment regulations:

- *Regulations for Taught Degree Programmes (2023)*
- *Annex: Regulations for pre-registration nursing programmes (2023)*

8. Support for learners

The following systems are in place to support learners to be successful with their studies:

- A programme and practice learning handbook and induction at the beginning of studies
- A Personal Tutor will support the learner throughout the course (see programme and practice learning handbook for further details)
- Library resources, include access to books, journals and databases - many of which are available in electronic format – and support from trained library staff
- Access to Blackboard, our Virtual Learning Environment (VLE), which is accessible via PC, laptop, tablet or mobile device
- Access to the MyBNU portal where learners can access all University systems, information and news, record attendance at sessions, and access personalised timetable
- Academic Registry staff providing general guidance on University regulations, exams, and other aspects of students and course administration
- Central student services, including teams supporting academic skills development, career success, student finance, accommodation, chaplaincy, disability and counselling

- Support from the Bucks Students' Union, including the Students' Union Advice Centre which offers free and confidential advice on University processes.

9. Programme monitoring and review

BNU has a number of ways for monitoring and reviewing the quality of learning and teaching on the programme. Learners will be able to comment on the content of their programme via the following feedback mechanisms:

- Formal feedback questionnaires and anonymous module 'check-ins'
- Participation in external surveys
- Programme Committees, via appointed student representatives
- Informal feedback to the programme leader

Quality and standards on each programme are assured via the following mechanisms:

- An initial event to approve the programme for delivery
- An annual report submitted by the External Examiner following a process of external moderation of work submitted for assessment
- The Annual Monitoring process, which is overseen by the University's Education Committee
- Review by the Nursing and Midwifery Council

10. Internal and external reference points

Design and development of this programme has been informed by the following internal and external reference points:

- The Framework for Higher Education Qualifications (FHEQ)
- The relevant NMC Standards (NMC 2018)
- The BNU Qualifications and Credit Framework
- The BNU Grading Descriptors
- The University Strategy
- The IfATE Nursing Associate Occupational Standard (2018, updated 2022)

Nursing Associate Mapping

The NMC (2018) Nursing Associate Proficiencies have been mapped to the appropriate module(s) in which they will be taught and to the Programme learning outcomes. Core proficiencies will be covered in several modules, in Year (part) 1+2. Mapping includes NMC (2018) Annexe A – Communication and relationship management skill are incorporated in all modules and Annexe B – Procedures to be performed by the Nursing Associate. The module and programme content has also been mapped against the IFATE (2018) Standards for Nursing Associates and BNU Graduate attributes.

YEAR 1				
Module Title	Programme Learning Outcome	BNU Graduate attributes	NMC (2018) NA Proficiencies	IFATE (2018) - Knowledge, Skills, and Behaviours (KSBs)
